**Features**

- Full IP65 protected glass front
- Input source selection with soft touch buttons on the front side
- Programmable user preferences
- RS232 remote control
- Auto new timing search for VGA and RGB input
- Picture in picture and picture by picture
- DICOM® gamma correction for viewing PACS images
- Comprehensive image setting features like colour temperature and gamma correction
- Advanced image processing algorithms such as noise reduction and motion adaptive deinterlacing
- Loop through for all video signals
- High quality BNC connectors for video signals prevent loosing of the cables by oversight
- External 24V DC power supply or internal 110-230V AC power supply
- VESA 100 mounting
- Medical safety and EMC approvals

**Multiple Timings, One Display**

This multi-resolution (up to 1280 x 1024) LCD with analog video inputs is unique. Unlike most digital flat panel displays, the **FP1800MBNC** will work effectively with most current and legacy modality systems. It is pre-programmed with dozens of standard analog video timings for medical applications. And more are being added all the time\*.

\* Canvys may also be able to custom program a matching signal to your legacy system based on the manufacturer, part number and / or system application. Please contact your local Canvys representative to verify the compatibility of your timing's requirements.

**Upgrade or Replace**

The **FP1800MBNC** bridges the gap between original CRT monitors and current digital LCD technology. Now you can upgrade your monitors without replacing your entire analog system. There's no need to change video cards, cameras or other external hardware.
